# Advance AcroBatt™

## Cordless Back Pack Vacuum

### Safety and Maneuverability for Obstacle-Intensive Areas

Introducing . . . the revolutionary Advance AcroBatt™ cordless backpack vacuum that's ideal for obstacle-intensive areas and areas that lack convenient electrical outlets. Now you can clean more area in less time without electric cord hassles.

The AcroBatt™ deep cleans and utilizes two stages of filtration to optimize air flow and waterlift in hard-to-clean areas. The AcroBatt™ is perfect for cleaning aisles, hallways, elevators, and stairwells or facilities that are occupied 24/7. Plus, the AcroBatt™ works great as a spot or optical cleaning tool in retail environments, gyms and more.

Not only do you have the perfect solution for challenging cleaning areas, you have a safe worry-free way to clean. No more worrying about tripping over extension cords or losing your footing on stairs while you vacuum. The AcroBatt's diffuser with reduced air flow noticeably lowers noise levels resulting in satisfied building occupants, patrons, and operators.

The AcroBatt™ backpack vacuum is designed for operator comfort with a wide, heavily-padded waist belt for maximum comfort and support. The dual battery system's weight is distributed near the operator's center of gravity for additional comfort. In addition, the AcroBatt™ backpack features a patented articulated joint which means the machine bends and flexes with the operator for greater range of motion and comfort.

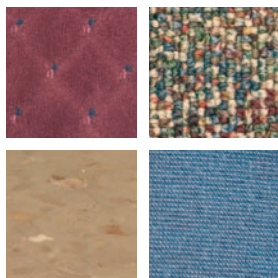

Raised bumps on the top of the vacuum back are an added bonus because they provide a gentle massage as the operator moves about. A unique lower ventilated panel separates the motor compartment from the operator to deflect hot air and minimize sweating.

The AcroBatt™ is energized by two maintenance-free nickel metal hydride batteries, powerful yet lightweight batteries that have repeatedly been a first-energy choice within the power-tool industry.

The AcroBatt™ also includes "smart" charger technology that monitors battery voltage and temperature that adjusts the amperage output to maximize the life of the batteries. Compact as well as productive, the AcroBatt™ backpack vacuum can clean an impressive 30,000 square feet within its 22 minutes run time!

### Ideal Applications Include —

- Hospitals/Healthcare Facilities
- Commercial Cleaning
- Education
- Government Buildings and Installations
- Stairs
- Elevators
- Factories
- Retail and Malls
- Healthclub Facilities
- Spot Cleaning
- Daytime Cleaning
- Airports/Train Stations

VALUE FEATURES

Very productive in obstacle-intensive environments.

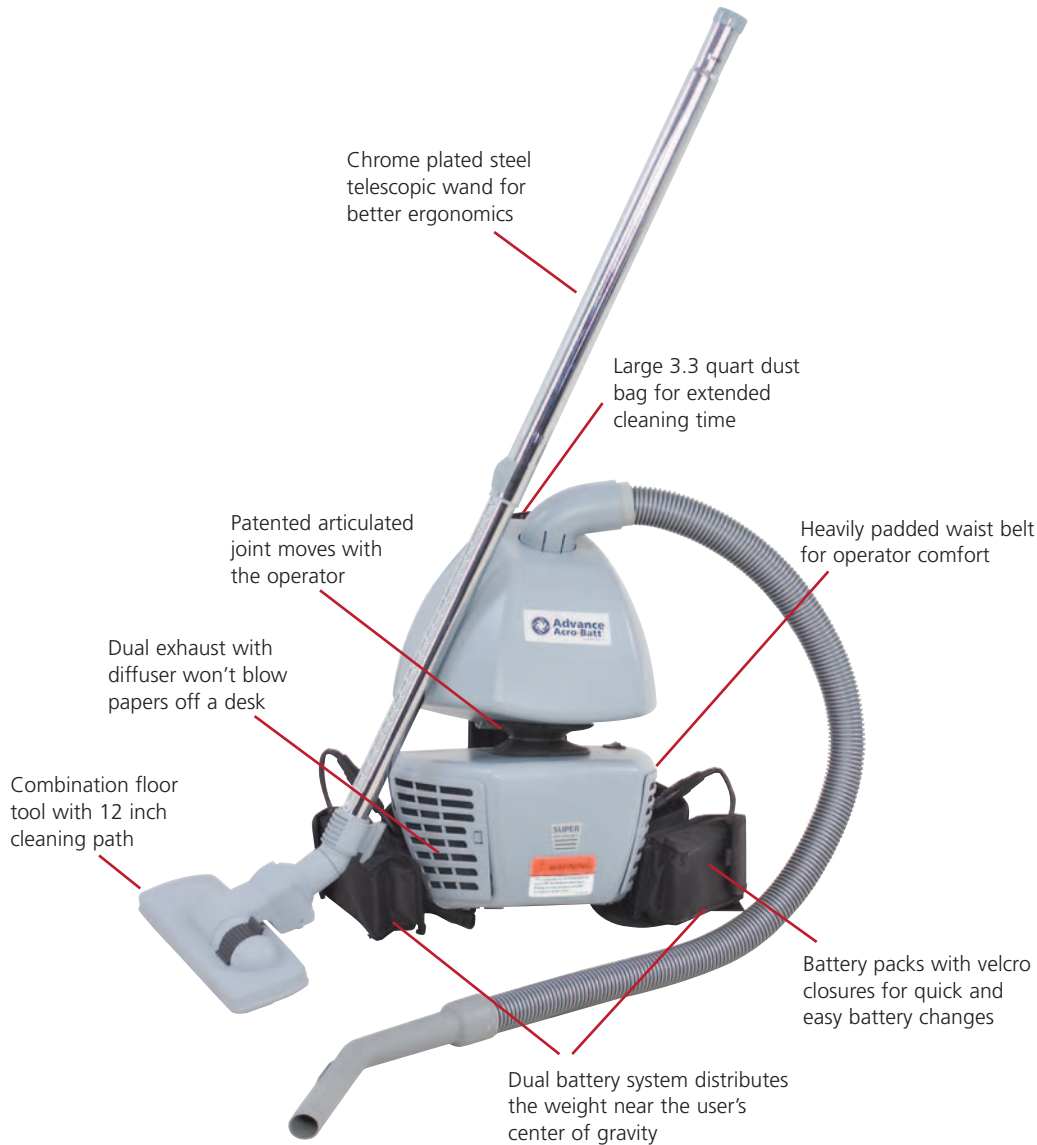

Comfortable to wear with articulated joint and heavily-padded belt system.

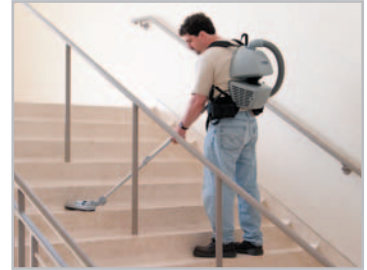

Simple and foolproof operation with fully automatic charger.

Low sound level and cordless operation is perfect for daytime cleaning.

Adjustable dust brush allows for cleaning hard to reach areas

No cords makes vacuuming steps easy

Comfortable lightweight wand with suction control valve provides secure grip and controls suction power for cleaning all surfaces

Nickel metal hydride batteries provide virtually full vacuum performance throughout the discharge cycle.

Complete tool kit for commercial cleaning tasks

Fully automatic smart battery charger monitors battery's voltage and temperature for worry free operation

VALUE FEATURES

*The Advance AcroBatt™, designed with Total Clean™ Technology, is very comfortable and safe to use — by design. The result is increased productivity. The Advance AcroBatt™ is also designed with features to make it easy to clean up and maintain after cleaning. That reduces the total cost of ownership and drives down the cost of cleaning.*

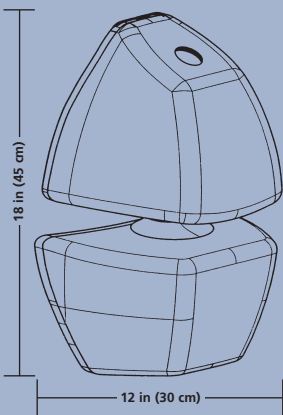

The Advance AcroBatt™ backpack vacuum is perfect for cleaning congested areas or where cords pose a danger.

## Defining Cleaning Innovation...

- Our products are designed using innovative technology that increases productivity and drives down the cost to clean.
- You can get expert service and maintenance for your products by factory-trained personnel around the world, as well as fast parts delivery.
- Maintain peak performance with genuine APA parts.

## Technical Specifications

Vacuum Motor	450 W
Weight with Batteries	17.6 lb (8.0 kg)
Run Time, Single Charge	20 - 22 min
Charge Time	75 min
Nominal Voltage	60 Vdc
Approvals	ETL & CE
Waterlift	46.4 in
Airflow	56.6 cfm
Battery Type	Ni-Mh
Filtration	2 Levels
Sound Pressure Level ISO11203	68 dB A

Specifications are subject to change without notice.
