# Introducing innovative WYPALL\* Cleaning Systems

**NEW WYPALL\* Cleaning Systems make cleaning better and faster than ever.**

Looking for a new way to clean more efficiently and effectively? Kimberly-Clark Professional introduces two NEW WYPALL\* Brand cleaning options to help make cleaning office buildings, lodging and healthcare facilities faster and better. The WYPALL\* Microfiber Cloths with Microban® Protection and the WYPALL\* Dusting System are designed with the cleaning professional in mind, and are environmentally friendly, green cleaning options that can be used without chemicals.

The WYPALL\* Microfiber Cloths with Microban® Protection help you to clean smarter while inhibiting the growth of stain and odor-causing bacteria on the cloths. The WYPALL\* Dusting System helps make cleaning easier with its ability to find those hard to reach locations. Try these two NEW products and find out why the WYPALL\* Brand is committed to cleaning up faster and better than ever.

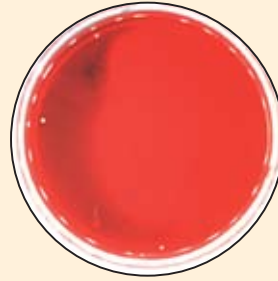

**Environmentally friendly cleaning for lodging, office buildings and healthcare facilities.**

New WYPALL\* Microfiber Cloths with Microban® Protection make it easy to reduce your annual cleaning costs by improving your efficiency and reducing chemical use.

## The First Microfiber Cloth with Microban® Antimicrobial Product Protection

**How the mechanical action of the cloth works:**  
Removes up to 99% of bacteria from surfaces

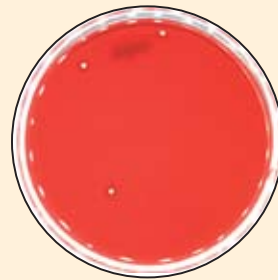

WYPALL\* Microfiber Cloths with  
Microban® Antimicrobial Protection

Cotton cloth

Photo set 1

**Helps prevent cross contamination**

WYPALL\* Microfiber Cloths with  
Microban® Antimicrobial Protection

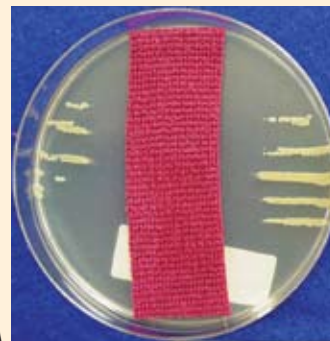

Cotton cloth

Photo set 2

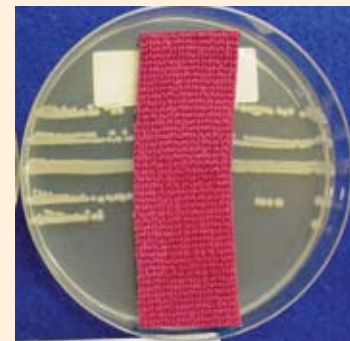

This photography shows the effectiveness of WYPALL\* Microfiber Cloths with Microban® Protection on removing bacteria from a surface in comparison with a common cotton cloth. The white dots in the dish are actual bacteria left behind on a surface wiped with WYPALL\* Microfiber Cloths with Microban® Protection and a common cotton cloth. The first photo set shows the results of the mechanical action of the cloth removing bacteria from the surface. The second photo set shows the results of the mechanical action of the cloth holding the bacteria and preventing the bacteria from being transferred to another surface.

**How Microban® Antimicrobial Product Protection works:**

When bacteria come in contact with the cloth, Microban® Antimicrobial Product Protection penetrates the cell wall of the microorganism, disrupting cell functions and making it unable to function, grow and reproduce.

A

B

Picture A shows that even after repeated washings the WYPALL\* Microfiber Cloths with Microban® Protection still prevent the growth of bacteria, while picture B shows an untreated cloth does not. (AATCC147)

### Only WYPALL\* Microfiber Cloths feature Microban® Antimicrobial Product Protection.

Microban® Antimicrobial Product Protection is built-in protection that gives WYPALL\* Microfiber Cloths with Microban® Protection an added level of protection against stain and odor-causing bacteria.

Microfiber Cloths may not release bacteria during typical laundering conditions (do not use bleach or high-temperature water). Even after laundering, the WYPALL\* Microfiber Cloths with Microban® Protection inhibits bacteria from thriving, providing added protection to the cloth.

Dirt. Odors. Bacteria. Get them all with the first microfiber cloth with Microban® Antimicrobial Product Protection.

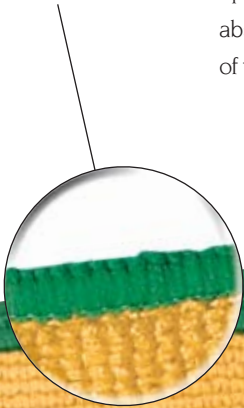

## NEW WYPALL\* Microfiber Cloths with Microban® Protection are durable, absorbent and environmentally friendly.

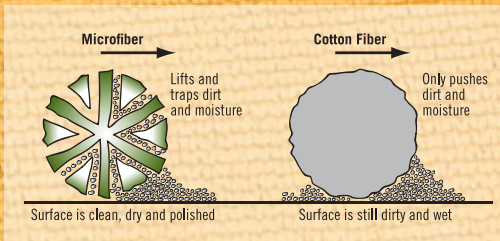

Looking for a new way to remove microbes? You've just found it with NEW WYPALL\* Microfiber Cloths with Microban® Protection, which inhibit the growth of odor and stain-causing bacteria on the cloth. They're the first microfiber cloths with Microban® Antimicrobial Product Protection. Microfiber material is made by splitting fibers into tiny pieces and knitting them into a super-cleaning cloth that effectively traps soil and absorbs liquid for a streak-free shine.

To get the green clean, look for the green seam.

WYPALL\* Microfiber Cloths with Microban® Protection, when dampened with water, physically remove up to **99%** of bacteria from non-porous surfaces. The cloths are thick, heavy, durable, and remarkably absorbent; holding up to 8 times their weight in liquid. They're your "greener" cleaning option because of their ability to both clean and remove bacteria from surfaces without the use of added chemicals.

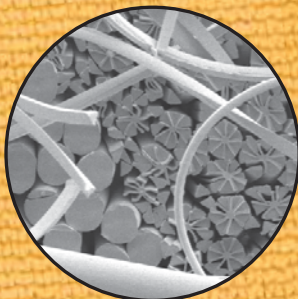

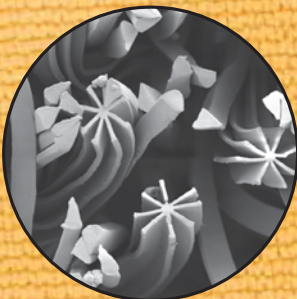

### Microfiber vs. Cotton Fiber

WYPALL\* Microfiber Cloths with Microban® Protection

Competitive Microfiber Cloth

WYPALL\* Microfiber Cloths with Microban® Protection provide strong surface cleaning due to increased surface area. The cloth's small split fibers allow it to grab the bacteria from surfaces. The fiber's shape gives excellent absorbency and allows it to hold up to 8 times its weight in liquid. 100% of yarns are composed of 16-segmented pie bicomponent splittable microfibers composed of 70% polyester and 30% nylon.

Quality Products  
for Environmental Solutions

## The microfiber cloth with maximum benefits

### Economical and Efficient

- Absorbs up to 8 times its weight in liquid
- Can be laundered 300 times
- Reduces annual cleaning costs
- Improves efficiency/reduces chemical use

### Cleans Virtually Any Surface

- Lifts and traps dirt and moisture
- Use wet, dry or damp

### Antimicrobial protection built right in

#### Keeps Cloths Cleaner and Fresher

- Inhibits growth of odor-causing bacteria on the cloth
- Works 24/7

#### Protection Won't Wash Out

- Antimicrobial protection built in during manufacturing
- Effective even after 300 washings

#### Proven History of Safe Use

- Extensive independent testing of Microban® Antimicrobial Product Protection
- Microban® Antimicrobial Product Protection is an EPA registered formula

## Microban® Protection can be found in leading consumer products from around the world.

From AMANA Brand washers and dryers to ORECK Brand vacuum cleaners, many of today's products are protected by Microban® Antimicrobial Product Protection. WYPALL\* Wipers and Microban® Antimicrobial Product Protection are two trusted brands with strong performance reputations. Through this unique partnership, WYPALL\* Microfiber Cloths with Microban® Protection bring innovative cleaning solutions to the marketplace, as the only microfiber cloths with Microban® Antimicrobial Product Protection.

High. Low. Everywhere. Pick up more dust in more places with this easy-to-use innovation.

## WYPALL\* Dusting System puts cleaning innovation in the palm of your hand.

The NEW WYPALL\* Dusting System† takes on your hardest to reach places with an innovative approach to cleaning under, over and around furnishings – even up into ceiling corners. To meet all your dusting challenges, the system includes short and long reusable handles, disposable duster heads and a convenient dusting mitt.

†Where Available

# NEW WYPALL\* Dusting System: The right tools for the job.

## WYPALL\* Dusting System Duster Head

- 380,000 dust-trapping polyester fibers, equivalent to 39 miles in length
- Environmentally friendly: chemical-free dusting leaves no residue, suitable for all surfaces
- Soft, flexible fibers change shape for dust pick-up in crevices and contours where dust cloths can't reach

## WYPALL\* Dusting System Handles

- Six-inch handle with ergonomic grip for dusting low areas
- Ergonomic long handle extends to 3 feet with 7 cleaning positions to reach virtually anywhere
- Ready-to-use with no assembly required
- Fold for space-saving storage

## WYPALL\* Dusting Mitt

- Dust-grabbing material traps up to 2 times more dust than treated dust cloth material
- Environmentally friendly: chemical-free dusting leaves no residue, suitable for all surfaces
- Universal size
- Convenient and disposable
